Re: Statistical Analysis Certificate / LYFO DISK™ Products

Dear Microbiologics Customer,

A Statistical Analysis Certificate including estimated CFU/pellet is available for most LYFO DISK™ microorganism strains upon request.

This service is available for \$182.52 in addition to the cost of the LYFO DISK product. The analysis will take approximately 2 - 4 weeks to complete depending on the microorganism's growth rate.

Please note that LYFO DISK Statistical Analysis Certificates do not provide the same level of validation and verification data as the documentation available for Microbiologics enumerated product lines. All counts provided during this process are approximate values. Microbiologics does not guarantee you will obtain the same value with your testing process.

Please contact our Customer Service team at 1.320.253.1640 or info@microbiologics.com with any questions regarding this process.

Sincerely,

The Microbiologics Team
